THE ODIN PROJECT

June 2023 - Ongoing

SUMMARY

With a dynamic entrepreneurial background as the founder of a successful digital marketing agency, I have recently pivoted my professional journey towards software development. This transition showcases my adaptability, eagerness to learn, and a strong foundation in both technical and interpersonal skills. My coding journey, sparked in my teens by a fascination with command lines and .bin programs, has evolved into a passionate pursuit of a career in the tech industry.

PROJECTS

WORKOUT APP | DEPLOYED | REPO

Side Project | June 2023 - January 2024.

Technologies: JavaScript, React, Ruby On Rails, Postgres, Vercel, Heroku.

Description: Create, schedule, track and analyse your workouts!

Achievement: Implemented accurate dynamic scheduling across multiple routines whilst maintaining efficient UX.

FANTASY FINANCE | DEPLOYED | REPO

Bootcamp Project | 14 Days. June 2023.

Technologies: JavaScript, React, CSS, Ruby On Rails, Axios, Bootstrap.

Description: Engineered a risk-free paper trading platform to empower traders in refining their strategies.

Achievement: Successfully implemented CRUD operations on multiple models, and a robust user authentication process.

FOOTBALL FRIENDS | DEPLOYED | REPO

Bootcamp Project | 9 Days. May 2023.

Technologies: JavaScript, React, Express, MongoDB.

Description: Co-created an innovative app for football enthusiasts to connect over team and player preferences.

Achievement: Practising pair programming, daily stand-ups, and merge conflict resolution. I was also designated the code owner on GIT.

COMPUTER FORENSICS AND SECURITY

Leeds Beckett University

2017

H O B B I E S
